Special Features:

Usolid state; 5 vdc filtered power supply to prevent over voltage conditions to provide 50 ma per character for logic operations; 5 vdc supply providing 180 ma per character or a 2.5v to 4.2v 60 cycle or higher frequency full wave rectifier unfiltered source, to permit display brightness; operating temp -55 degrees c to 95 degrees c; environmental tests are altitude, humidity, vibration, shock, hermetic seal; design life shall be 100000 hrs of operation; 1.390 in.Lg, 1.060 in.W; three digit indicator;

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A532n0
