Overall Length:

18.250 inches

Overall Height:

7.000 inches

Overall Width:

17.125 inches

Product Name:

Boxcar averager system

Special Features:

Item consists of boxcar mainframe model 162 nsn 6625-01-161-1060, option 162/97 a/b arithmetic, option 162/98 digital readout, option 162/99 digital storage, model 163 sampling integrator module, option 163/98 s2 (75 picosec) sampling head, model 165 gated integrator module and model 115 preamplifier

Functional Description:

Used for extracting and averaging electronic signals from optical detectors used in pulsed laser experiments

General Description:

Power 105-125 or 210-250 vac, 50-60 hz, 85 va

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
