| End Application: |
|--|
| Tektronics das9100 series digital analysis system |
| Unit Type: |
| Main frame test signal |
| Criticality Code Justification: |
| Feat |
| Special Features: |
| Electrostatic discharge sensitive; previous name acquisition module; 8 channels; 10ns/100mhz sampling resolution/sampling frequency; 4 |
| modules per system; 32 channels per system; triggering 1 level, arms mode, glitch trigger; synchronous/asynchronous; 1 qualifier |
| Shelf Life: |
| N/a |
| Unit Of Measure: |
| |
| Demilitarization: |
| Yes - demil/mli |
