Mounting Type:

Panel

Overall Length:

23.750 inches

Overall Height:

5.250 inches

Overall Width:

16.750 inches

Frequency Range Rating:

+2.000/+26.500 gigahertz

Usage Design:

Simulator validation

Voltage Rating:

100.0 volts and 240.0 volts

Frequency Band Quantity:

4

Modulation Type:

Pulse

Crystal Controlled Feature:

Not provided

Calibrated Signal Output Range:

Minus 100 db to plus 8 db

Modulator Location:

Internal

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T320-j
