End Application:

An/alq-161 radio frequency surveillance/electronic countemeasures subsystem

Special Features:

Wrequested name test set, program, interferometer; c/o interface adapter; provides electrical connection between the test station signals & uut; termination/buffering necessary to match test signals to measurement devices in teststation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
