Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

End Application:

Support of nsn 6620-01-114-5760 epr indicator

Electrical Power Source Relationship:

Operating

Functional Description:

Used to indicator the output of the auto throttle potentiometer; provides digital indication of ouput voltage ratio during alignment of the auto throttle potentiometer in the command channel main housing

Supplementary Features:

Manufacturers name: voltage ratio readout kit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
