Circuit Current For Which Designed:

Ac

Frequency Rating:

60.0 hertz

End Application:

B-1b aircraft

Furnished Items And Quantity:

Power cable 1, interface patch cords 2, carrying case, ac power supply 10 vrms 2000 hz provided for transducer excitation; dc power supply provided as excitation for ac power supply

Operating Voltage Rating In Volts:

115.0 ac

Supplementary Features:

Manufacturers name: transducer nulling test set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A310a0
