End Application:

F-16a/b aircraft

Unit Type:

Relay multiplexer

Criticality Code Justification:

Feat

Special Features:

Max input 170 v between terminals; 50 ma per channel; maximum switch rate 475/second; switches 20 channels; weapon system essential

Functional Description:

Multiplexes signals to dvm or other instruments; measures outputs of strain gage and other transducers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-b
