**Ac Voltage Rating:**

Between 120.0 volts and 208.0 volts

**Frequency Rating:**

400.0 hertz

**System For Which Designed:**

Electronic or mechanical

**Output Signal:**

Provides facilities for generating synthetic operating and control signals for application to the unit under test

**Operating Control Method:**

Technician

**Phase:**

Three

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T222-a
