Ac Voltage Rating:

Between 120.0 volts and 208.0 volts

Frequency Rating:

400.0 hertz

System For Which Designed:

Electronic or mechanical

Output Signal:

Provides facilities for generating synthetic operating and control signals for application to the unit under test

Operating Control Method:

Technician

Phase:

Three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T222-a
