Frequency Rating:

10.0 megahertz

Major Components:

3cpw w/1 mb memory, dual i/o processor, controller, mag tape formatter and cntrl, mag tape, peripheral controller encl, multifunction pc, moving head disc, console device cntrl, display terminal, card reader, line printer, interval timer, disc pack, software

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Detect, isolate, check out faults

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
