End Application:

An/gss-20 test set

Component Type And Quantity:

2 indicator and 2 lamp and 2 resistor and 1 transistor

Special Features:

Manufacturers name: tester, potentiometer alarm; permits installer to view lights for verification of alarm signals at extended distance and multiple detector outputs at the same time

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A5110
