Overall Length:

48.700 inches

Overall Height:

23.600 inches

Overall Width:

31.500 inches

Ac Voltage Rating:

Between 100.0 volts and 240.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Electrical Power Source Relationship:

Operating

Indicator Type:

Cathode ray tube

Special Features:

Consists of hp8510a w/opt 010, 8515a s-parameter test set, 8340b synthesized sweeper w/opt 005 with accessories of 85050a 7mm calibration kit, 85051a 7mm verification kit, 85052a 3.5mm calibration kit, rf return cables and adapters, installed in a portable 85043a system rack; includes 1 year on site maintenance, installation and calibration; option e03 consists of 9836cs, computer; 9876a, printer; and 7475, plotter; frequency range: 45 mhz to 26.5 ghz; real-time error corrected measurements; 50 db effective directivity, 40 db effective source and load match, 70 db to 100 db dynamic range; 0.001 db, 0.01 degree, 0.01 nanosecond measurement resolution; time domain analysis

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
