Special Features:

Nain: potentiostat-galvanostat; power supply: line/load regulation 0.01 pct; amplifier: output 20v, current 7a, gain 200, 000 open loop dc; signal impedance 8 ko; meter range switch: 15 positions, 1, 2, 5 sequence from 0.2 ma-10a; monitor 10 mv full scale; 50 lbs; model 178 electrometer probe, electrometer monitor, 2 current monitorbinding posts

Functional Description:

Identifies types of corrosion; measures difference between reference and working electrodes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-d
