Power Rating:

1.0 watts average

Special Features:

Frequency range: from f1 minus 1550 mhz to f5 minus 1450 mhz, where f1 and f5 are per mis-23260; power rating 1.0 watt average input, continuous, with a short circuit, any phase, at each output; characteristic impedance: 50 ohms; temperature range (operating and nonoperating): minus 46 degrees celsius to plus 71 degrees celsius; altitude range: operating: sea level to 8,000 ft, nonoperating: sea level to 40,000 ft; construction: case, aluminum alloy 6061, temper t6, per qq-a-250/11, connectors shall mate with sma male permil-c-39012; finish: chemical conversion coating per mil-c-5541, class 3 and paint, except connectors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A512n0
