End Application:

An/apg-68

Unit Type:

Analyzer/pattern generator

Special Features:

Mfg name-20 mhz pattern generator/analyzer mainframe

Functional Description:

High speed pattern generation and test capabilities via dual microprocessor architecture and modular plug-in i/o cards

Supplementary Features:

Supports 1k-4k memory i/o cards

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
