General Description:

Measures impedance magnitude and phase; an internal oscillator provides test signals from 400 khz to 110 mhz; meter can measure and display impedance magnitude from 10 millohms to 100 killohms; impedance phase is displayed from plus 180 degrees to minus 180 deg; accuracy is as good as 3 percent; operating temp 0 to 55 degrees c; power: 100/120/220 v; 48 to 66 hz; 19.600 in. Lg, 16.750 in. W, 7.000 in. H; accessories furnished; low-ground probe kit includes probe, spare pins, spare clips, bnc adapter and case
