Attachment Method:

Crimp

Terminal Wire Hole Diameter:

0.800 inches

End Shape:

Chamfered

Mounting Configuration:

Surface contact

Special Features:

Long stroke test probe with a closed end housing made of nickel/silver alloy; plungers are heat treated; can travel a maximum .250 deflection; springs made of wire; two different compressions: this one has heavy spring of 1.75 oz. Initial & 7 oz. At .166 deflection; serrated tip is .060 in diameter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-d
