End Application:

Fiber optic cable system

General Description:

For testing fiber optic cable systems; technical characteristics: transmitter light source 1.300 micron led, output power 19.800 dbm, meter opticalwavelength 1.200 to 1.300 micron; optical bandwidth 100 nanometers, optical cable adapters, fiber optic loopback connector, transit case, operating power50/60 hz, 115 v ac, single phase, o/a dim 18 in. L, 8.500 in. H, 12.000 w

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
