Circuit Current For Which Designed:

Dc

Scale Division Quantity:

10 single indicator all ranges

Indicator Type:

Vibrating reed

Installation Design:

Panel

Movement Type:

Vibrating reed

Power Source:

External

Scale Graduation Type:

Linear single indicator single range

Special Features:

Single indicator with two scales, lower scale 0.0 to 50.0 dc amperes for f-16a, upper scale 0.0 to 100.0 dc amperes for f-16b aircraft

Functional Description:

Used on instrument pane of f-16a/b aircraft

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A310a0
