General Description:

Dc position transducer; carrier/amplifier system; includes transistorized converter, differential transformer type transducer element and phase sensitive demodulator circuit; input volts 24.0; electrical stroke 0.625 in.; scale factor v/in. No load 12.0; case dia. 0.75 in.; temp. M65.0 to p250.0 far.; 4 wire lead terminals

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
