Current Rating:

12.500 milliamperes

Voltage In Volts And Current Type:

120.0 ac

Product Name:

Wrist strap monitor

Special Features:

Voltage requirements 120 vac, 50/60 hz; input resistance to ground 3 megohms ; resistance exceeding 3 megohms triggers alarm; operating temp range 32 degrees f to 122 degrees f; weight 1 lb; enclosures: aluminum, beige and brown enamel input jack on front panel of monitor; green led glows to show the wrist strap is in proper working order; if led goes out and a red led and audible alarm sound it will alert the operator to check the strap; furnished with mounting bracket for mounting on or below the work surface; dimensions of monitor 4 9/16 wide and 1 15/16 inch high

Functional Description:

Constant monitoring of wrist straps, detects intermittent problems, accepts any conductive wrist strap with banana hz plug; built in audible and visual alarms; for use at static protective work stations; performs continuity checks on the wrist strap to detect any open circuit which may occur between the user and ground

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
