Overall Length:

2.860 inches

Overall Height:

0.860 inches

Overall Width:

2.480 inches

Frequency Rating:

Between 2.0 gigahertz and 4.0 gigahertz

Criticality Code Justification:

Feat

Special Features:

Critical application: aircraft, harrier av-8b; environments per mil-p-23971; aluminum housing; epoxy primer w/epoxy paint, blue; 50.0 ohms impedance; 3.0 db average coupling; 1.3 to 1 maximum vswr; 0.3 db maximum insertion loss; 20.0 dbmin isolation; plus 3 maximum phase balance; plus 0.2 db maximum amplitude balance; 100.0 mw min power level; one input and two output ports, type n; grounding surface void of paint but treated w/class 3 conductive; 95 degrees c operating, 125 degrees c storage, ambient temperature; used with test set, elect.Equip

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A512n0
