Dc Voltage Rating:

9.0 volts

End Application:

Digital data systems

Electrical Power Source Relationship:

Self-contained

Internal Battery Accommodation:

Included

Inclosure Feature:

Single item w/housing

Test Type For Which Designed:

Bit error rate

Operating Test Capability:

Fault isolation and bit error

Special Features:

Opt 001 is hp18192a carrying case; opt 101 is hp18183a rs-232c/v.24 intfce; frame data for testing character oriented systems; transmits fox messages and performs following start-up tests: end-to-end half duplex ping-pong test, local modem loopback test, test for usage of remote testing capability of the bell 208b modem; manipulates/monitors individual signal lines on rs-232c/v.24 interface or crosspatch lines from dce to dte interface; powered by six 9 volt alkaline batteries, battery life exceeds 50 operating hours

Functional Description:

Performs standard bit and block error tests and measures errored seconds, percent error free seconds, timing delay and parity errors

Reference Data And Literature:

Hp 1988 catalog

Supplementary Features:

115/230 vac power modules are available from hp

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
