Functional Description:

Interfaces w/gearbox assembly, 1560-01-211-3920 and actuator, 1680-01-182-6356, to simulate aircraft conditions; provide access to actuator switches and mechanical input torque; checks continuity between switches and connector pins; apply 50 vdc and measure ground isolation; apply 500 vdc to actuator connector pins to check insulation resistance; apply 1000 vac and check current leakage; check backlash, manual cranking limits, manual releas limits, speed load limits and stall torque limits; c/o cable harness assembly, p/n ta1022a250 and relay panel, p/n ta10221200; cable assembly is 1 male 1 female connector10 gauge wire and rubber tubing
