End Application:

Network analysis system c/of 8510b analyzer, s-parameter test set and a compatible rf source

Electrical Power Source Relationship:

Operating

Indicator Type:

Cathode ray tube

Functional Classification:

Aa-9.3

Special Features:

Frequency range: 45.0 mhz to 26.5ghz; source: hp8350 series sweep oscillators/hp 8340b and 8341b synthesized sweepers; measurement capabilities: transmission/reflection characteristics, s-parameters, active device characterization, full accuracy enhancement, time domain capability (with opt 010), hp-ib programmable; opt e75 consists of: 8513a, 85051a, 85050a, 85014aopt655, 85013aopt655, 8717bopt001-011, 11612a, and 85043a

Supplementary Features:

Tnetwork analyzer system; comes with full calibration kits; type n coaxial interfaces; used to facilitate accurate and repeatable complex measurements of passive and active devices in a minimal amount of set up and analysis time

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T263-c
