Overall Length:

12.000 inches

Overall Height:

3.000 inches

Overall Width:

9.000 inches

End Application:

Disturbance analyzer, p/n 626

Unit Type:

Timing

Functional Classification:

Aa-12.11

Special Features:

Provides 8 channels to detect alarm-type signals; correlates use rates of equip; accumulates use times; provides elapsed time info for logic voltage signals or relay contacts; impedance 1 mohm; 200 vdc input; time resolution 10 msec; respons 1.2 msec; 2-wire differential; on: 2.30 vdc; off 1.80 vdc

Entry Date:

92-07-15

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
