**Overall Length:**

0.500 inches

**Overall Height:**

0.150 inches

**Overall Width:**

0.375 inches

**Frequency Rating:**

Between 10.0 megahertz and 50.0 megahertz

**Voltage Standing Wave Ratio:**

1.30

**Insertion Loss In Decibels:**

0.5

**Special Features:**

Environmentals per mil-p-23971; eight 0.312 in. Lg, 0.017 in. Dia, foureach side along lg; 3.0 db maximum coupling; 0.1 db maximum amplitude balance; plus 1.0 degrees c maximum phase balance; 30.0 db min isolation; 50.0 ohms impedance; 200 mw minpower level (matched loads); 20.0 mw internal termination; m2.5 porm 2.0 degrees at frequency insertion phase between input and output 1; thermal shock resistant to m55 degrees c; vibration resistant; two way power division

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A512n0
