End Application:

P/n 2396004, cage 49671; an/gsm-285 test equipment

Special Features:

Previous non approved item name: monitor, power line; voltage range 95.0 to 135.0 vac (line to neutral) 60 hz; sense input voltage band - low and high limits between 95 and 135 vac; input freq band 55.0 to 65.0 hz; time delay pick-up 10 msec to 2.5 sec, adj; main output relay; individual fault indicating relays- low voltage, voltage high, freq low, freq high, phase high and phase rotation; contacts rated 1 amp at 28 vdc; oper temp m20deg c to p71deg c; same for non-oper; humidi type 20 to 80pct non-condensing; altitude 0 to 7000 ft; 50-60-400-hz; 7.75x3.75x3.10

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
