T228-b

Electrical-electronic Test Equipment Plug-in Unit - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6625-01-263-6680

Unit Type:
Signal conditioner
Special Features:
Provides bridge completion, balance, calibration circuits for strain gage and 1-, 2-, 4-arm bridge transducers, also provides
calibration/balance circuits for rtds and potentiometers, bridge completion for asymmetrical bridges; voltage excitation 0.1-18 v; current 125
ma; current excitation 1-100 ma; 10000 mohms isolation
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Filg:
