Unit Type:

Signal conditioner

Special Features:

Provides bridge completion, balance, calibration circuits for strain gage and 1-, 2-, 4-arm bridge transducers, also provides calibration/balance circuits for rtds and potentiometers, bridge completion for asymmetrical bridges; voltage excitation 0.1-18 v; current 125 ma; current excitation 1-100 ma; 10000 mohms isolation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
