Special Features:

C/o emulation memory control card, one or more memory cards; an interconnecting memory bus cable; 64k memory

Functional Description:

Compatible with most 8 bit emulators; offers simple programming for many proms used in microprocessor system design

Supplementary Features:

Emulation memory subsystem; includes option 011 with 64k memory

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30800
