**Special Features:**

C/o emulation memory control card, one or more memory cards; an interconnecting memory bus cable; 64k memory

**Functional Description:**

Compatible with most 8 bit emulators; offers simple programming for many proms used in microprocessor system design

**Supplementary Features:**

Emulation memory subsystem; includes option 011 with 64k memory

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A30800
