|---------|----------|---|
| Special | Features | • |

C/o emulation memory control card, one or more memory cards; an interconnecting memory bus cable; 64k memory

## **Functional Description:**

Compatible with most 8 bit emulators; offers simple programming for many proms used in microprocessor system design

## **Supplementary Features:**

Emulation memory subsystem; includes option 011 with 64k memory

Shelf Life:

N/a

**Unit Of Measure:** 

Demilitarization:

No

Fiig:

A30800
