Does Deep Does Does Does Does Does Does Does Does	
Overall Depth:  1.250 inches  Overall Length:  3.250 inches  Overall Width:  3.750 inches  3.750 inc	Circuit Current For Which Designed:
Decral Length: 3.250 inches  Deveral Width: 3.250 inches  Deveral Width: 3.50 inches  Installation Design: I and held  Dewer Source: Internal  Display Type: Light emitting diode  Features Provided: Internal battery accommodation and portable  Circuit Attachment Method And Quantity: I banana jack  Deverally Voltage Rating In Volts: I banana jack  Deverally Special Features: Wanufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ad illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline statery  Style Designator: I and-held  Shelf Life:  Via  Duit Of Measure:  Demilitarization: No	Dc
Overall Length: 5.250 inches Overall Width: 5.750 inches Overall Width: 5.750 inches Installation Design: Hand held Overer Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Deparating Voltage Rating In Volts: 19.0 dc Special Features: Wanufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Shelf Life: Wa Jult Of Measure: - Demilitarization: No	Overall Depth:
Description of the second of t	1.250 inches
Overall Width: 3.750 inches Installation Design: Hand held Power Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Departing Voltage Rating in Volts: 19.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Shelf Life: No Unit Of Measure: Demilitarization: No	Overall Length:
anstallation Design: Hand held Power Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: Ibanana jack Deprating Voltage Rating In Volts: 19.0 dc Special Features: Wanufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Sheft Life: Wa Unit Of Measure: Demilitarization: No	6.250 inches
Installation Design: Indiand held Power Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Deparating Voltage Rating In Volts: I9.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline statery Style Designator: Identifies: Via Unit Of Measure: Demilitarization: No	Overall Width:
Power Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Deparating Voltage Rating In Volts: I9.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline sattery Style Designator: Hand-held Shelf Life: Wa Unit Of Measure: Demilitarization: No	3.750 inches
Power Source: Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Departing Voltage Rating In Volts: I 9.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Shelf Life: Wa Jinit Of Measure: - Demilitarization:	Installation Design:
Internal Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Departing Voltage Rating In Volts: 19.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Skyle Designator: Hand-held Shelf Life: Wa Juit Of Measure: - Demilitarization: No	Hand held
Display Type: Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Departing Voltage Rating In Volts: Ig.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Shelf Life: Wa Unit Of Measure: - Demilitarization: No	Power Source:
Light emitting diode Features Provided: Internal battery accommodation and portable Circuit Attachment Method And Quantity: I banana jack Operating Voltage Rating In Volts: 19.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery Style Designator: Hand-held Shelf Life: Wa Unit Of Measure: - Demilitarization:	Internal
Features Provided: Internal battery accommodation and portable  Circuit Attachment Method And Quantity: I banana jack  Operating Voltage Rating In Volts: Ig.0.0 dc  Special Features:  Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery  Style Designator:  Hand-held  Shelf Life:  N/a  Juit Of Measure:  Demilitarization:	Display Type:
Internal battery accommodation and portable  Circuit Attachment Method And Quantity:  I banana jack  Operating Voltage Rating In Volts:  19.0 dc  Special Features:  Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery  Style Designator:  Hand-held  Shelf Life:  N/a  Juit Of Measure:  Demilitarization:	Light emitting diode
Circuit Attachment Method And Quantity:  I banana jack  Operating Voltage Rating In Volts:  19.0 dc  Special Features:  Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline battery  Style Designator:  Hand-held  Shelf Life:  N/a  Unit Of Measure:  Demilitarization:	Features Provided:
Departing Voltage Rating In Volts: 19.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery Style Designator: Hand-held Shelf Life: N/a Unit Of Measure: - Demilitarization:	Internal battery accommodation and portable
Operating Voltage Rating In Volts: 19.0 dc Special Features: Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery Style Designator: Hand-held Shelf Life: N/a Unit Of Measure: - Demilitarization:	Circuit Attachment Method And Quantity:
Special Features:  Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery  Style Designator: Hand-held  Shelf Life: N/a  Unit Of Measure: - Demilitarization:	1 banana jack
Special Features:  Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery  Style Designator:  Hand-held  Shelf Life:  N/a  Unit Of Measure:  Demilitarization:  No	Operating Voltage Rating In Volts:
Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; red ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery  Style Designator: Hand-held Shelf Life: N/a  Unit Of Measure: - Demilitarization: No	19.0 dc
ed illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkaline pattery  Style Designator: Hand-held  Shelf Life: N/a  Unit Of Measure:  Demilitarization: No	Special Features:
Cattery  Style Designator: Hand-held  Shelf Life: N/a  Unit Of Measure:  Demilitarization: No	Manufacturers suggested name wrist strap tester; if resistance range is between 750kohm and 10megohm, a green led will illuminate; rec
Style Designator: Hand-held Shelf Life: N/a Jnit Of Measure: - Demilitarization: No	led illuminates if resistance to ground of the tested device is out of this range; 3m dual lock wall mounting kit may be used; uses 9v alkalin
Hand-held  Shelf Life:  N/a  Jnit Of Measure:  Commilitarization:	battery
Shelf Life: N/a  Jnit Of Measure: - Demilitarization:	Style Designator:
N/a  Jnit Of Measure:  - Demilitarization:	Hand-held
Jnit Of Measure: - Demilitarization:	Shelf Life:
- Demilitarization:	N/a
Demilitarization:	Unit Of Measure:
No	
	Demilitarization:
Filg:	No
