Unit Type:

Standard

Mounting Method:

Bench and rack

Special Features:

Consists of a sensor input unit siu-210, a selection control unit scu-210, 5 antennas, 2 current probes and the associated cables; allows radiated e field measurements from 10 khz to 1.8 ghz, conducted measurements from 20 hz to 100 mhz, radiated h-field measurements from 20 hz to 50 khz; ieee 488 interface

Functional Description:

A complete sensor/preselector system for performing radiated and conducted rfi/emi measurement

Supplementary Features:

Manufacturers name: emi spectrum analysis set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A532p0
