Overall Length:

16.750 inches

Overall Height:

3.500 inches

Overall Width:

14.000 inches

Current Type:

Ac

Accessory Component Quantity:

6

Voltage Rating:

Between 110.0 volts and 240.0 volts

Mounting Method:

Bench

Accessory Component Name:

Chassis slides; rackmount kit; transit case; carrying case, line cord; manual

Measurement Type:

Frequency

Frequency Range:

+0.300/+110.000 gigahertz

Accuracy Rating:

2.2mhz accuracy with a 50 nanosecond pulsed signal

Gate Time:

0.015 microseconds

Supplementary Features:

For freq above 26.5 ghz model 588 must have opt 5802 and 5804 for up to 110 ghz; frequency extension cabling kit model 890, and sensor options are required; wt 35lbs, max pulse width cw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T297-a
