Current Type:

Ac

Ac Voltage Rating:

115.0 volts

Frequency Rating:

Between 50.0 hertz and 400.0 hertz

Phase:

Single

Special Features:

Test cable assembly; connects to cable under test and indicates an open wire or faulty pin when the switch is set on test select; when switch is set at the short position the 60 cable wires are test in groups of 8 and any short between wires will be indicated by short led

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A532r0
