Overall Length:

1.640 inches

Overall Height:

0.600 inches

Overall Width:

1.210 inches

Frequency Rating:

Between 5.0 megahertz and 750.0 megahertz

Voltage Standing Wave Ratio:

1.50

Insertion Loss In Decibels:

0.7

Power Rating:

2.0 watts peak

Special Features:

Corrosion resistant ferrous alloys and corrosion resistant metals, enamel; two 0.140 in. Diameter mounting holes on 1.060 in. Mounting centers; one input and two output female sma connectors; two way power division; split: m3 db nom; output port isolation: 25 db; phase balance: porm 2 deg; impedance: 50 ohms; amp balance: 0.2 db max; vswr: 1.3 to 1 max; metallic shield enclosure; operating temp. Range: 0 to 60 degc; storage temp. Range: m62 to 75 degrees c; altitude pressure: 50000 feet; shock resistant temp: m55 to 85 degrees c; humidity, shock and vibration resistant

Precious Material And Location:

Connector surfaces gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A512n0
