Overall Height:

15.000 inches

Overall Width:

12.000 inches

Special Features:

18.000 in. Lg; wt 50 lbs

Functional Description:

allows operator to select various interconnecting circuits, precision loading resistors and a delay circuit that is required in testing and calibration of an/aam-76; test bench set, infrared reconnaissance

Supplementary Features:

Contains bnc connectors and test points used to monitor tests by volt/ohm meter, oscilloscope, and freq. Counter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A17600
