Overall Length:

20.000 inches

Overall Height:

5.250 inches

Overall Width:

18.500 inches

Furnished Items And Quantity:

Tunnel diode test fixture 1; ac power cable 1

Unpackaged Unit Weight:

48.000 pounds

Functional Classification:

Aa-10.3

Functional Description:

For calibration and maintenance of oscilloscopes and related instruments

Entry Date:

92-07-16

Shape:

Rectangular

Supplementary Features:

1amplitude calibrator porm dc and square wave to 200 volts; time mark generator 1 ns to 50 seconds with high accuracy time base tcxo; fast rise pulse generator 1 ns rise time positive and negative going pulses; high amplitude pulse generator 60 volts unterminated; constant amplitude sinewave generator 250 khz to 250 mhz; -50 of part number means: add front panel cover, add side mounted handle, add blank panel to space where dm501 multimeter is normally located and delete 50 ohm signal delay line

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T263-b
