**Average Life Measurement:**

Not rated

**End Application:**

5895-01-270-9164, signal analyzer

**Basic Shape Style:**

Rectangular or square

**Inclosure Type:**

Encased

**Circuit Construction Type:**

Solid state

**Special Features:**

Down converts microwave signals to freq range of hp8902a measuring receiver; for modulation or freq measurement above 1.3 ghz, it routes signal through its internal mixer; below 1.3 ghz signals are routed to input of hp3902a; requires plus 8 dbm leveled output from oscillator; for lo's w/power above 18 ghz, it offers optional 188-26.5 ghz amplifier

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
