Average Life Measurement:
Not rated
End Application:
5895-01-270-9164, signal analyzer
Basic Shape Style:
Rectangular or square
Inclosure Type:
Encased
Circuit Construction Type:
Solid state
Special Features:
Down converts microwave signals to freq range of hp8902a measuring receiver; for modulation or freq measurement above 1.3 ghz, it
routes signal through its internal mixer; below 1.3 ghz signals are routed to input of hp3902a; requires plus 8 dbm leveled output from
oscillator; for lo's w/power above 18 ghz, it offers optional 188-26.5 ghzamplifier
Shelf Life:
N/a
Unit Of Measure:
<del>-</del>
Demilitarization:
No
Fiig:
A32200
