Average Life Measurement:

Not rated

End Application:

5895-01-270-9164, signal analyzer

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Circuit Construction Type:

Solid state

Special Features:

Down converts microwave signals to freq range of hp8902a measuring receiver; for modulation or freq measurement above 1.3 ghz, it routes signal through its internal mixer; below 1.3 ghz signals are routed to input of hp3902a; requires plus 8 dbm leveled output from oscillator; for lo's w/power above 18 ghz, it offers optional 188-26.5 ghz amplifier

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
