**Ac Voltage Rating:**

208.0 volts

**Output Current Type:**

Ac and dc

**Output Voltage Rating:**

Between 0.000 volts and 1500.000 volts

**Output Current Rating:**

Between 0.000 amperes and 2.500 amperes

**Phase:**

Three

**Functional Classification:**

Aa-1.3

**Special Features:**

Mfg name-circuit analyzer

**Functional Description:**

Used for continuity and insulation resistance testing

**Supplementary Features:**

Controlled by ibm personal computer or compatible; dims. Computer 38.5 in. L, 33.0 in. W, 22.0 in. H; switching console 48.5 in. L, 33.0 in. W, 27.0 in. H

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-c
