Ac Voltage Rating:

208.0 volts

Output Current Type:

Ac and dc

Output Voltage Rating:

Between 0.000 volts and 1500.000 volts

Output Current Rating:

Between 0.000 amperes and 2.500 amperes

Phase:

Three

Functional Classification:

Aa-1.3

Special Features:

Mfg name-circuit analyzer

Functional Description:

Used for continuity and insulation resistance testing

Supplementary Features:

Controlled by ibm personal computer or compatible; dims. Computer 38.5 in. L, 33.0 in. W, 22.0 in. H; switching console 48.5 in. L, 33.0 in. W, 27.0 in. H

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-c
