Overall Length:

19.500 inches

Overall Height:

7.500 inches

Overall Width:

18.500 inches

Ac Voltage Rating:

110.0 volts

End Application:

An/aar-44

Unit Type:

Standard

Functional Classification:

Aa-3.3

Functional Description:

Emulates digital data program

Entry Date:

92-07-14

Supplementary Features:

Built in test; internal bus; printer port; 3-1/2 in disk drive; portable; multiple error detection and generation per word and message; programmable output amplitude; dynamic rt response; 10k monitor stack space; rt response 4 microsecond capability; plasma display; rt/bct monitor simultaneously

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532p0
