**Frequency Range Rating:**

+1.000/+20.000 megahertz

**Calibrated Signal Output Range:**

1024-65536 kilobits per channel

**Special Features:**

Word generator/simulator is 16 channel digital generator; crt display; hexadecimal or binary; external clock and trigger outputs; external oscillator input; plug-in stored program card; remote control interfaces; resolution range (50 ns): 0.1 us - 99.9 us and 1ms - 999 ms

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T320-j
