End Application:

C-130

Product Name:

Bridge, capacitance-resistance

Functional Classification:

Aa-12.2

Special Features:

Manufacturers name: ac capacitance field calibration unit; small carrying case weighing 8 lbs; solid state internal circuits and lcd readout; battery powered

Functional Description:

Ac field calibration unit designed to test capacitance type liquid gauging systems and their line replaceable unit components; can be used whenever capacitance measurement, capacitance substitution or insulation measurement is required; measures capacitance values of individual or sets of tank units and/or fuel gauging circuits; inserts appropriate capacitance values of a fuel gauge circuit to allow functional check of calibration

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-d
