Functional Description:

Interface for fault detection and isolation

Supplementary Features:

Provides mechanical interface between the mate test station and unit under test (uut) as follows: station power and stimulus to uut, uut stimulus response to the station and station cooling

Fsc Application Data:

Tests gyro constraintment electronics p/n 6499-332130; nha inertial data assembly, milstar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
